

Spoke with Dr. Harjes (Internal Medicine spec.) at Idexx - disc. fecal PCR, additional diagnostics, +/- treatment.

Adult cats and kittens can shed corona virus and not linked to FIP, no specific treatment. Echo may shed intermittently depending on chronicity.

Panleukopenia- Symptomatic care +/- broad spectrum abx if not already completed.
Echo is chronically leukopenic- so likely not related to panleuk positive PCR.

Even though Cobalamin is wnl- rec. treating, if underlying disease cobalamin will continue to decrease.

Rec. recheck AUS- consider biopsy.
