NOTES

IMMUNOLOGY

a EAU Interpretation

(EAU = Elisa Absorbance Units. EAUs indicate the level of allergen specific IgE detected. The magnitude of the signal does not necessarily correlate with the severity of the disease but reflects the pet's immune response to allergens.)

> = 300: Scores in this range are considered significant. Immunotherapy for these allergens should be considered if they are found in the pet's environment and they relate to the clinical history.

80 - 299: Scores in this range are considered significant if the allergens are found in the pet's environment and they relate to the clinical history.

STEP 1: CHOOSE ROUTE OF ADMINISTRATION & FORMULATION

The highest EAU from immunotherapy mixes will be included based on prescription set chosen below unless you customize your prescription

Subcutaneous 95-28495-00 3 vials

10,000 PNU/mL, 1,000 PNU/mL and 100 PNU/mL
FOR MITE ONLY: 1:200 w/v, 1:2,000 w/v, and 1:20,000 w/v

- ☐ 1 Prescription Set Include up to 12 positive allergens
☐ 2 Prescription Sets Include up to 24 positive allergens
☐ Customized Prescription Up to 24 positive allergens; if greater than 12 allergens, 2 prescription sets will be required.

If you wish to select a stronger prescription check box below*:

- ☐ 95-28496-00 3 vials
 20,000 PNU/mL, 2,000 PNU/mL and 200 PNU/mL

*Stronger prescriptions are not recommended, especially if the pet is small, historically sensitive to medications, or where immunotherapy provides multiple fungals and insects. Not available for mite only.

Sublingual 95-0001114-00 2 vials

20,000 PNU or strongest available per vial
 Available for canine and feline ONLY.

- ☐ 1 Prescription Set Include up to 12 positive allergens
☐ Customized Prescription Include up to 12 positive allergens

Limited to 12 allergens only.

Allergens with the highest EAU from immunotherapy mixes will be included unless specific allergens are selected or provided in the alternative allergens spaces.

FOR CUSTOMIZED PRESCRIPTIONS ONLY SELECT SPECIFIC ALLERGENS

You may want to consider selecting allergens that the pet has specific reactions to, cannot be avoided and are known to be relevant to the pet's environment. Inclusion of flea allergens in immunotherapy is not recommended.

IMMUNOTHERAPY MIX 1

- | Item | EAU |
|---|-----|
| <input type="checkbox"/> Lepidoglyphus destructor (B71) | 96 |
| <input type="checkbox"/> Pigweed Mix (P5) | 106 |
| <input type="checkbox"/> Pine Mix (P37) | 300 |
